Allowable Subject Matter

1. Claims 1, 2, 4-7, 9-11, 13 and 14 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Claim 1 recites a continuous method of making a combinatorial library of materials comprised of the steps of providing a plug flow reactor, introducing one or more components into the reactor, introducing or changing over time in the plug flow reactor to which the components were added at least one variable affecting the components to produce a combinatorial library of materials. The Examiner considers the previously cited Bergh reference to be the closest prior art. Bergh teaches the formation of a combinatorial library of materials by changing a variable across an array of reactors and not in a single reactor to affect one or more components to produce the library as in the instant claims. The Examiner also notes that he now agrees with Applicant regarding the Wolfe reference. See Applicant's Arguments, page 5, submitted 4/10/08.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
